Superb Garden & Greenhouse Performance

GardenChoice™

Bred by: Garden Genetics

Crushed Crimson

Georgia Peach

Lively Lavender

Sultry Scarlet

Tupelo Honey

DAHLIGHTFUL® DAHLIAS

These compact growers, with gorgeous blooms set off by deep chocolate foliage and exceptional tolerance to most powdery mildew strains, are now available as rooted liners at Mast Young Plants!

Consumers love Dahlightful® Dahlias because they can enjoy the gorgeous flowers all summer long. Plants continue to bloom from late spring through fall against a backdrop of colorfast dark leaves, while maintaining their compact, dense growing habit.

Retailers can take advantage of the rich, jewel-toned flower hues to stock late summer color for repeat shoppers.

The Dahlightful® series keeps producing flowers from early through late in the season. While these bloomers won't sit on the bench at retail, should a slow weekend or two pass, plants will continue to produce new flowers to entice customers.

Beautiful in containers, Dahlightful® Dahlias are equally show stopping in the landscape.
