

# Helianthus

## SOL SEEKER™ YELLOW BY DANZIGER

8" pot finished spring 2021 in Grand Rapids, MI. No PGRs. Pinched 2 weeks before transplant.

MYPX

AVAILABLE SPRING OF 2022 AS  
A ROOTED LINER **EXCLUSIVELY**  
FROM MAST YOUNG PLANTS

### Features

- Compact Helianthus can be finished in 6.5" and 8" containers and in ground beds
- Rooted liners will arrive pinched
  - Can finish a 6.5" or 8" pot without more pinching, resulting in a finished plant with 3-4 breaks. For more breaks, pinch the nodes one more time after transplant to encourage more shoots.
- Height of 32-36" and width of 24-28"
- Day length response of 11 hours
- Can finish for late April in southern regions and May in northern regions
- Aggressive PGR applications not necessary
  - Spray Daminozide at 1,000-2,500 ppm during growth phase to tone; to hold a finished plant height, apply a 1 ppm Paclobutrazol drench.
