

Introducing...

CAPELLA™
**HELLO
YELLOW**

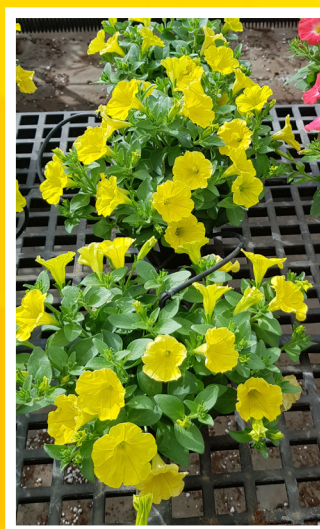

Capella™ Petunias were new to the market in 2018/19 and in just these past 3 years, they have grown in popularity as more growers give them a try and find success with this series.

This series is known for a naturally controlled habit making it suitable for quart production, but still able to nicely fill out a hanging basket. In Danziger's trials it held its round shape with flowers all the way around the plant throughout the entire summer with no lodging or "bird nest" tendencies.

Hello Yellow Features:

- Everyone is looking for that rich deep saturated yellow color in a petunia. Danziger is pleased to bring this variety to market with their usual summer performance with this deep yellow flower color.
- Controlled habit that fits the Capella™ series well.
