

# INTRODUCING TRADESCANTIA NANOUK

Nanouk features beautiful dark green, mint, pink, and magenta foliage as well as larger leaves than other Tradescantia varieties. It is an effortless addition to indoor and outdoor programs as a beautiful houseplant or in shady outdoor combination planters and baskets. This variety is sure to spice up summer sales!

## CARE

- Keep the soil slightly moist, but don't water directly into the crown
- Mist Tradescantia plants frequently, especially in the winter, to prevent the plant from getting too dry
- Feed your plant monthly with a half-strength liquid fertilizer
- To avoid fading leaf markings, keep in bright indirect sunlight

## HABIT

- Very compact and upright growth habit, and spreads freely
- Typically reaches a height and width of just under 4"
- Stems are thick, and the leaves are smooth on top and a bit furry on the underside
- When kept indoors, the plant may bloom through the winter months
